[www.ivona.se](#)

Full-stack developer with hands-on experience across the entire stack - from PostgreSQL schema design and TypeScript backends to responsive Vue and Nuxt frontends. I own features end to end and care about the details that make products feel finished: clean UX, solid test coverage, and maintainable code. My background in design and communication means I bridge the gap between engineering and the people who use what I build.

SKILLS

Languages: TypeScript, JavaScript, C#, SQL

Frontend: Vue 3, Nuxt, React, HTML, CSS, Tailwind, SCSS, PrimeVue

Backend: Node.js, Bun, Hono, .NET / ASP.NET Core, RESTful APIs, Drizzle ORM

Databases: PostgreSQL, MongoDB, Supabase

AI & LLM tooling: LangChain, Hugging Face, MCP, RAG pipelines, embeddings & vector search, Claude CLI

Infra & DevOps: Docker, CI/CD (GitHub Actions, Azure DevOps), nginx, Linux self-hosting

Testing: Vitest, Playwright (E2E), xUnit, TDD

Other: Git, WordPress, PostHog

Soft skills: Strong communicator and active listener · self-aware and growth-oriented · organized and reliably punctual · curious and quick to pick up new technologies · collaborative in agile/mob-programming settings

PROFESSIONAL EXPERIENCE

Controla, Fullstack Developer consultant

May 2026 - Ongoing

- Built network throttling solution for a background file backup system
- Designed and implemented a multilingual content architecture with a runtime language toggle
- Implemented a sliding-window email verification token system supporting concurrent tokens with automated expiry
- Engineered onboarding and product tour flows with role-based gating, OAuth popup-blocking resilience, and user feedback collection
- Coordinated a full content and UI refresh across all task guides — managing bilingual copy, screenshot updates, and styling consistency across all platforms
- Implemented task dependency logic and background worker-based status sync

Controla, Fullstack developer trainee

March 2025 - April 2026

- Integrated PostHog for product analytics
- Built a server-side PDF report generation pipeline
- Developed admin-user tools: configurable email reminder cadence, automated user invitations, role-gated UI rendering
- Migrated the cyber score computation from the frontend to the backend; refactored found client-side inconsistencies and improved reliability
- Resolved UX edge cases across dialogs, task state management, and copy — improving product polish and consistency
- Configured lint-staged Git hooks to enforce formatting and linting standards
- Wrote E2E and integration tests covering role-differentiated behaviour for both admin and standard users

"Ivona's code was consistently high quality, well-documented, and thoughtfully tested. I'd confidently rate her above typical junior level." — Niklas Volcz, CPO & Co-Founder, Controla

Pink Programming, volunteer

January 2024 - Ongoing

- Help co-organise recurring community events including PinkSundays and PinkAfterWork, coordinating logistics and ensuring smooth attendee experiences
- Grow community engagement and visibility through social media
- Support workshop sessions by: welcoming attendees, facilitating discussions, and troubleshooting technical issues

Freelance developer

April 2024 - Ongoing

- Undertook freelance assignments through platforms and personal networks. Projects include developing a website for a published author, focusing on creating a user-friendly and aesthetically appealing design with responsive functionality. Additionally, a second phase is planned for a project with a secondhand store, involving the development of an e-commerce platform with integrated payment solutions and database setup. Other projects have included API integration and web performance optimization for small businesses.

Open source contributor

since 2023

- Fixing bugs for Spotify's Backstage, contributing documentation in Nuxt, and CodeCademy.

Frontend developer intern, Sublime

March 2023 - June 2023

- Helped the Sublime team build new features, solve bugs and issues that appear, and convert Figma mockups into seamless frontend components. Focused on implementing responsive web solutions with HTML, SASS, and JS.

Sales Coordinator, Sisu Net

March 2020 - July 2022

- Responsible for coordinating B2B flows (sales, inventory, financing) from order placement to delivery. Worked hand-in-hand with the sales force for support and active customer retention.

Co-founder and developer, The Smoke Detector

2012 - 2022

- A self-hosted blog with web server configuration and DNS. Used WordPress as CMS and implemented API integrations.

EDUCATION

.NET System developer full-time course

September 2024 - June 2025

Lexicon Stockholm

- C# .Net, ASP.NET Core
- Testing (TDD, xUnit, Moq)
- Database (SQL, database modeling, Entity framework core, NoSQL) ,
- Fullstack project (Blazor WASM, ASP.NET Core web API)
- Microsoft Azure (web App, CI/CD with Azure DevOps, CosmosDB, Azure SQL database)

Frontend development full-time course

September 2022 - June 2023

Lexicon Stockholm

- Responsive web development with HTML5 & CSS
- Frontend programming in JavaScript with React and Vue as frameworks
- Backend programming in Node.js with Express
- Databases: MongoDB

Masters in Communication, PR and Styling - 2012

Istituto Europeo di Design Milan, Italy

Bachelor's Degree in Fashion Design - 2007/2010

Faculty for Design Belgrade, Serbia
